

# Candidate Deborah Ross D-NC

## DEBORAH'S STRONG RECORD

### **On Expanding Benefits:**

Social Security financing that treats everyone fairly. To honor the promises we've made to our nation's seniors and meet the needs of future retirees, we must make common sense changes to our tax code. Right now, average Americans pay into our Social Security system for the entire year, while someone earning \$1 million a year stops paying into the Social Security system by Valentine's Day—more than 10 months sooner than everyone else. We must make changes to our payroll tax system so that millionaires and billionaires pay their fair share. Data also shows they live longer and collect more so it is only fair.

### **On Social Security's Earned Benefits:**

America's seniors have earned their Social Security and Medicare benefits through a lifetime of hard work. These programs give seniors the financial security they need to retire without worrying about affording critical health care services, prescription drugs, and basic necessities.

Many women who raise families do not have a pension or retirement savings to rely on. They earned a secure retirement and depend on these benefits. To weaken or dismantle Social Security and Medicare is to break a promise to seniors.

Deborah will work in the U.S. Senate to make sure Social Security and Medicare are there for our seniors when they need them. She will work to secure and strengthen them—not privatize or end them—so future generations can enjoy the financial security they've earned.

### **Endorsement on Social Security Record:**

"Our nation needs your leadership, vision and determination to fight for working families and older Americans. You earned the endorsement of the Nation Committee because you understand and support the critical roles that Social Security and Medicare play in the retirement and health security of our nation's older citizens and their families. You are well-prepared to serve the needs of seniors and will make the preservation and enhancement of Social Security a priority in the Senate."

-National Committee to Preserve Social Security and Medicare
